DETAILED ACTION

Amendment received on June 16, 2005 has been acknowledged.

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings filed on March 01, 2002 are proposed drawings that include hand-written reference numbers and letterings. Also, the font size and hand-written letters used in Fig. 11 are too small. The Examiner respectfully requests the Applicant to provide formal drawings. Applicant is advised to employ the services of a competent patent draftsman outside the Office; as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 1-46 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The primary reasons for allowance is because the prior art of record does not teach an interlaced image that is parallel to the plurality of lenticules oriented in the axial direction and such that a line parallel to the axial direction and at least one of the bars of the bar code diverge from a common point to define a lenticular bar code image.

Art Unit: 2876

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Chen, U.S. Patent Application Publication No. 2005/0000128 A1, teaches a box body having a grating and a bar code.
